Call Sign: WSJS

Permit File Number: BP-20220825AAD

Grant Date: January 11, 2023

This permit expires 3:00 a.m.  
 local time, 36 months after the  
 grant date specified above.

Permit to change site, Class, patterns, and reduce power using existing  
 WSMX/WPOL tower.

Subject to the provisions of the Communications Act of 1934, as amended,  
 subsequent acts and treaties, and all regulations heretofore or hereafter  
 made by this Commission, and further subject to the conditions set forth  
 in this permit, the permittee is hereby authorized to construct the radio  
 transmitting apparatus herein described. Installation and adjustment of  
 equipment not specifically set forth herein shall be in accordance with  
 representations contained in the permittee's application for construction  
 permit except for such modifications as are presently permitted, without  
 application, by the Commission's Rules.

Commission rules which became effective on February 16, 1999, have a  
 bearing on this construction permit. See Report & Order, Streamlining of  
 Mass Media Applications, MM Docket No. 98-43, 13 FCC RCD 23056, Para.  
 77-90 (November 25, 1998); 63 Fed. Reg. 70039 (December 18, 1998).  
 Pursuant to these rules, this construction permit will be subject to  
 automatic forfeiture unless construction is complete and an application  
 for license to cover is filed prior to expiration. See Section 73.3598.

Equipment and program tests shall be conducted only pursuant to Sections  
 73.1610 and 73.1620 of the Commission's Rules.

## Special operating conditions or restrictions:

- 1 Permittee shall install a type accepted transmitter, or submit application (FCC Form 301) along with data prescribed in Section 73.1660(b) should non-type accepted transmitter be proposed.
  
- 2 Before program tests are authorized, sufficient data shall be submitted to show that adequate filters, traps and other equipment has been installed and adjusted to prevent interaction, intermodulation and/or generation of spurious radiation products which may be caused by common usage of the same antenna system by Stations WSJS, WSMX ID#24682, and WPOL ID# 72970, and there shall be filed with the license application copies of a firm agreement entered into by the 3 stations involved clearly fixing the responsibility of each with regard to the installation and maintenance of such equipment. In addition, field observations shall be made to determine whether spurious emissions exist and any objectionable problems resulting therefrom shall be eliminated. Following construction, and prior to authorization of program test under this grant, all 3 stations shall each measure antenna or common point resistance and submit FCC Form 302 as application notifying the return to direct measurement of power.
  
- 3 Licensee shall be responsible for satisfying all reasonable complaints of blanketing interference within the 1 V/m contour as required by Section 73.88 of the Commission's rules.
  
- 4 A license application (FCC Form 302) to cover this construction permit must be filed with the Commission pursuant to Section 73.3536 of the Rules before the permit expires.
  
- 5 Existing ground system consists of 120 evenly spaced, buried, copper wire radials, between 44 meters and 54.9 meters in length, plus a 12.2 meter by 12.2 meter copper ground screen, about the base of the tower.

Special operating conditions or restrictions:

- 6 Before program tests are authorized, permittee shall submit a complete nondirectional proof of performance to establish that the efficiency is approximately 256.6 mV/m/kw at one kilometer, as proposed. The proof shall include at least six approximately equally-spaced radials with sufficient close-in points such that the inverse distance field can be clearly established. (See 47 CFR Section 73.186).
